Migrating to Windows 10 doesn’t have to be difficult, costly or time-consuming

Now is the right time to deploy Windows 10. Windows 7 is quickly approaching end-of-life and your organization, your users and your data could be at risk. Windows 10 introduces a raft of new technologies and features to delight your end-users.

With PSD you can now make it as easy to image and deploy computers...all shapes and sizes and it exploits the power of Powershell scripting.

MDT + PSD -> OSD Anytime, Anywhere, Anyone!

PSD enables you to extend your MDT Lite Touch Installation capabilities beyond traditional IT boundaries. With PSD you can now make it as easy to wipe and reload computers at home, hotels, on-the-go just as easily as if you were in the office.

Fast
Our approach is based on PowerShell scripting expertise perfected over years of development, testing and real-world implementation with customers of all shapes and sizes.

Modern
We use automation and PowerShell as our bread and butter. PSD updates MDT to run on the scripting tools your IT team already knows and uses—PowerShell.

Simple
The last thing you need is yet another tool (or another cost) in your systems management toolbox. PSD extends the functionality of MDT that you’re probably already using.

HTTP/S
Let’s face it, traditional OSD (imaging) just doesn’t work outside corporate boundaries. By leveraging IIS, you can securely and efficiently provide the real-time imaging and rebuild support your users will appreciate.

Bare metal, Refresh, Replace and more!!
We know that OS deployments and imaging scenarios come in many flavors. New devices, repurposing, computer swaps and more. PSD can be used for those scenarios as well as other challenging administration and management tasks where complex sequences of events are required.

Windows 7 end-of-life is near.
Take control of your environment and make the move to Windows 10 the easy way with modern tools.

MDT + PSD!

Industry Best Practices
Small companies, large companies, governments, heck even heads of state want to have, use and enjoy the really cool stuff that we use.

Some of it we developed, some of it we use because dang it, it just works so well. You should too!
## Why TrueSec?

TrueSec has solved desktop deployment and management challenges in complex scenarios for customers just like you all around the globe.

**Acclaimed Resources** - Our staff includes acclaimed resources, world-renowned MVPs and notable contributors to the deployment community.

**Proven** - Our track record for training, deployment services, hydration, automation and reCOVERY from ransomware and disaster recovery (and prevention) are in demand.

**Flexible** - With resources in the U.S., and across the globe, we can be where you need us — or — we can work remotely too! Whatever you need, wherever you need us...

**Training** - Our experience is not only in implementation, but training too. We can educate your staff on the technologies and the implementation we leave with you.

## Description of Services

<table>
<thead>
<tr>
<th>Service</th>
<th>Description</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Health Check(s)</td>
<td>Analyze existing OSD infrastructure and associated processes, identify options for optimizing imaging and deployment capabilities</td>
<td>1 day</td>
</tr>
<tr>
<td>PSD Installation</td>
<td>Install, configure and tune PowerShell Deployment kit for MDT to support UNC, HTTP and HTTPS deployments</td>
<td>1 day</td>
</tr>
<tr>
<td>Modern Driver Management</td>
<td>Install, configure and validate Modern Driver Management solution to simplify and automate driver maintenance and mgmt</td>
<td>1 day</td>
</tr>
<tr>
<td>IIS OSD Publishing</td>
<td>Deploy, configure and optimize your HTTP/S environment to securely deliver OSD deployments over the Web</td>
<td>1 day</td>
</tr>
<tr>
<td>Pilot and Testing</td>
<td>Implement the new PSD solution in a pre-production or production similar to validate PSD features and functions</td>
<td>1 day</td>
</tr>
</tbody>
</table>
